THE UNITED REPUBLIC OF TANZANIA
Supplement No. 37  13th September, 2019

SUBSIDIARY LEGISLATION

to the Gazette of the United Republic of Tanzania No.37. Vol.100 dated 13th September, 2019
Printed by the Government Printer, Dodoma by Order of Government

GOVERNMENT NOTICE NO. 676 published on 13/9/2019

THE ENVIRONMENTAL MANAGEMENT ACT
(CAP. 191)

REGULATIONS

(Made under sections 133 (4) and (5), 135(1) and 230(2)(f))

THE ENVIRONMENTAL MANAGEMENT (HAZARDOUS WASTE CONTROL AND MANAGEMENT) REGULATIONS, 2019

ARRANGEMENT OF REGULATIONS

PART I
PRELIMINARY PROVISIONS

Regulation  Title

1.  Citation.
2.  Application.
3.  Interpretation.

PART II
GENERAL PRINCIPLES

5.  Cleaner production principle.
6.  Right and duty to safeguard environment.
Environmental Management (Hazardous Waste Control and Management)

PART III
ADMINISTRATION AND INSTITUTIONAL ARRANGEMENT

7. Functions of Minister.
8. Functions of Director of Environment.

PART IV
HAZARDOUS WASTE MANAGEMENT AND HANDLING

12. Classification of hazardous waste.
13. Packaging of hazardous waste.
14. Labelling of hazardous waste.

PART V
IN-COUNTRY MOVEMENTS OF HAZARDOUS WASTE

15. Permits for in-country management of hazardous waste.
16. Application for permit to manage hazardous waste.
17. Requirements for permit to collect hazardous waste.
18. Permit for collection of hazardous waste.
20. Application requirements to store hazardous waste.
21. Permit for storage of hazardous waste.
22. Conditions for permit to store hazardous waste.
23. Application requirements of a permit to transport hazardous waste.
24. Permit for transportation of hazardous waste.
25. Conditions for permit to transport hazardous waste.
26. Labelling of vehicle or other means of conveyance.
27. Application requirements of permit to own or operate treatment, recovery, reuse, recycling or disposal plant or facility or site of hazardous waste.
28. Permit to own or operate treatment, recovery, reuse, recycling or disposal plant or facility or site of hazardous waste.
29. Conditions for permit to own or operate treatment, recovery, reuse, recycling or disposal plant or facility or site of hazardous waste.
30. Validity of permits for in-country movement of hazardous waste.
31. Offences relating to in-country movement of hazardous waste.
PART VI
TRANSBOUNDARY MOVEMENT OF HAZARDOUS WASTE

32. Focal point and competent authority.
33. Application requirements of export permit of hazardous waste.
34. Export permit.
35. Conditions for export permit of hazardous waste.
36. Application requirements for import permit of hazardous waste.
37. Import permit of hazardous waste.
38. Conditions for import permit of hazardous waste.
39. Application requirements for transit permit of hazardous waste.
40. Transit permit of hazardous waste.
41. Conditions for transit permit of hazardous waste.
42. Notification to Commissioner of Customs and Exports Controller.
43. Validity of permits for transboundary movement of hazardous waste.
44. Illegal traffic of hazardous waste.

PART VII
HEALTH CARE WASTE

45. Segregation of health care waste.
46. Securing and packaging of health care waste.
47. Treatment of health care waste.
48. Storage of health care waste.
49. Transportation of health care waste.
50. Transfer stations.
51. Monitoring.

PART VIII
PESTICIDES, RADIOACTIVE AND CHEMICAL WASTE

52. Management of pesticides waste.
53. Management of radioactive waste.
54. Management of industrial and consumer chemical waste.
PART IX
COMPLIANCE AND ENFORCEMENT

55. Powers of Environmental Inspectors to serve prevention orders.
56. Hazardous waste compliance orders.
57. Cancellation of permits.

PART X
GENERAL PROVISIONS

58. Duty to keep records.
59. Reporting procedures.
60. Liability.
61. Insurance.
62. Non-transferability of permit.
63. Self-environmental audit.
64. Offences and penalties.
65. Register.
66. Appeals
67. Minister to issue guidelines or orders.
68. Amendment of Schedules.
69. Repeal.

SCHEDULES
GOVERNMENT NOTICE NO. 676 published on 13/9/2019

THE ENVIRONMENTAL MANAGEMENT ACT
(CAP. 191)

REGULATIONS

(Made under section 133 (4) and (5), 135(1) and 230 (2)(f)

THE ENVIRONMENTAL MANAGEMENT (HAZARDOUS WASTE CONTROL AND MANAGEMENT) REGULATIONS, 2019

PART I
PRELIMINARY PROVISIONS

Citation
1. These Regulations may be cited as the Environmental Management (Hazardous Waste Control and Management) Regulations, 2019.

Application
2. -(1)These Regulations shall apply to all categories of hazardous waste and to the generation, collection, storage, transportation, treatment, recycling, reuse, recovery and disposal of hazardous waste and their movements in, into and out of Mainland Tanzania.

   (2) Without prejudice to subregulation (1), these Regulations shall also apply to all other waste destined for transboundary movement.

Interpretation
3. In these Regulations, unless the context requires otherwise-
   “Act” means the Environmental Management Act;
   “Council” means the National Environment Management
Council referred to under section 16 of the Act;
“Director of Environment” means a Director of Environment
appointed pursuant to section 14 of the Act;
“environment” has the meaning ascribed to it under the Act;
“Environmental Inspector” means an inspector appointed under
or designated pursuant to section 182 of the Act;
“harm” means interference with ecological systems of which
living organisms form part and in the case of a human
being it includes harm, distress or annoyance to any of
his senses and damage to his property;
“hazardous substance” has the meaning ascribed to it under the
Act;
“hazardous waste transfer station” means temporary storage
facility for collecting hazardous waste from various
sources before transportation for further treatment,
recycling, reuse, recovery or disposal.
“Minister” means the Minister responsible for matters relating
to the environment;
“permit” means a permit to collect or transport or store or own
or operate treatment, recycling or reuse or recovery or
disposal plant or facility or site export or import or
transit hazardous waste;
“polluter-pays principal” has the meaning ascribed to it under
the Act;
"precautionary principle" means a risk management approach
which requires that where there is risk of serious
irreversible adverse effects occurring, a lack of
scientific certainty should not prevent or impair the
taking of precautionary measures to protect the
environment;
“waste disposal site” means a site, used to dispose of or treat
waste and includes a mobile or immobile waste
treatment plant, waste storage or transfer facility;
“waste management” means the collection, transport deposit,
interim storage, transport, treatment and final disposal
of waste;
“waste management facility” means site or premises used for
the purpose of recovery, recycling, treatment or
disposal of waste; and
“waste producer’ means a person who creates or produces waste.

PART II
GENERAL PRINCIPLES

Principles

4.- (1) Any person generating, collecting, storing, transporting, treating, recycling, reusing, recovering and disposing of hazardous waste or any person exercising jurisdiction under these Regulations shall, in relation to any decision, order, exercise of any power or performance of any function, be guided by the following principles of environment and sustainable development relevant to hazardous waste management -

(a) precautionary principle;
(b) polluter pays principle; and
(c) producer extended responsibility.

(2) For the purpose of this regulation “producer extended responsibility” means a policy approach which requires that person producing or importing a product should internalize environmental costs in the production of the products and in whole life cycle of such product.

Cleaner production principle

5. A person who owns or operates a facility or premises which generate hazardous and toxic waste shall minimize the waste generated by adopting the following cleaner production principles -

(a) improvement of production process through conserving raw materials and energy by -

(i) eliminating the use of hazardous and toxic raw materials within such times as may be prescribed by the Minister; and
(ii) reducing toxic emissions and hazardous waste to a level prescribed in the applicable national environmental quality standards;

(b) monitoring the product cycle from beginning to end by -

(i) identifying and eliminating potential negative impacts of the product;
(ii) enabling the recovery and re-use of the product where possible; and
(iii) reclamation and recycling.

6.- (1) A person living in Tanzania shall-

(a) have a right to a clean, safe and healthy environment; and
(b) have a stake and a duty to-
(i) safeguard the environment from adverse effects of hazardous waste; and
(ii) inform the relevant authority on any activity or phenomenon resulting from hazardous waste that is likely to adversely affect the environment and human health.

(2) A generator of hazardous waste shall be responsible for the sound management and disposal of such waste and shall be liable for damage to the environment and harm occasioned as a result.

PART III
ADMINISTRATION AND INSTITUTIONAL ARRANGEMENT

7. The Minister shall be assisted in the discharge of his duties under these Regulations by the Director of Environment, the Council, local government authorities and Environmental Inspectors.

8. The Director of Environment shall-
(a) serve as the National Focal Point and the Competent Authority for the operation of the Prior Informed Consent Procedure for transboundary movement of hazardous waste under the Basel Convention;
(b) enhance sectoral coordination, monitoring, and mobilization of stakeholders for control and management of hazardous waste;
(c) promote institutional capacity to effectively
support environmentally sound management of hazardous waste;
(d) oversee the in-country and transboundary movements of hazardous waste;
(e) coordinate and promote public awareness on the control and management of hazardous waste; and
(f) develop guidelines for handling of hazardous waste.

9. The Council shall-
(a) receive and process Notification and Movement Documents for export of hazardous waste;
(b) receive and process in-country applications involving control and management of hazardous waste;
(c) establish and maintain information register and data related to the control and management of hazardous waste;
(d) inspect and monitor hazardous waste management facilities; and
(e) advise the Minister on issuance of consent and permits.

10. An Environmental Inspector may, in addition to the powers conferred under the Act or any other written law-
(a) stop and inspect any vehicle used for the transportation of hazardous waste; and
(b) enter upon any premises where hazardous waste is stored, processed or disposed of.

11.- (1) Each local government authority shall, with respect to its area of jurisdiction, ensure that-
(a) standards prescribed for the hazardous waste management are in place and operational at all the time;
(b) premises producing hazardous wastes are adequately ventilated and fitted with air polluting control facilities and are in compliance with prescribed standards;
(c) waste effluents are treated or are so modified as to comply with prescribed standards before final disposal; and
(d) hazardous standards at factory or on site before their discharge into public sewers or municipal oxidation ponds or in an open land or into receiving water bodies.

(2) Any standards, bylaws and guidelines set by the local government authority for the purpose of these Regulations, shall conform to standards set under these Regulations and the Act.

PART IV
HAZARDOUS WASTE MANAGEMENT AND HANDLING

12. Hazardous waste shall include waste set out in the First Schedule, Second Schedule and Third Schedule if it possesses any of the characteristics in the Fourth Schedule.

13.- (1) A person shall not pack or store hazardous waste in a container or package, unless the container or package in which that waste is to be contained, packed or stored meets international requirements approved by the Council.

(2) A container or packaging material provided for under sub-regulation (1) shall be suitable for storage of hazardous waste for which an application for storage has been made and shall -
   (a) not be reactive with the waste in question;
   (b) be free from the possibility of leakage; and
   (c) be capable of protecting the health of persons involved in handling the waste, the neighbouring community and the environment in general.

(3) A container or packaging materials provided for under this regulation shall be-
   (a) labelled;
   (b) punctured after its lifespan or after use; and
   (c) disposed of in accordance with these Regulations.

(4) A person who –
(a) packs or stores waste contrary to these Regulations;
(b) sells or offers for sale a container which has been used for the storage of hazardous wastes to be used for any purpose other than storage of wastes, commits an offence and shall on conviction be liable to a fine of not less than five million shillings but not exceeding ten billion shillings or to imprisonment for a term not exceeding twelve years or to both.

Labelling of waste

14. (1) A person shall not sell, offer for sale, use, pack, store or transport hazardous waste in a container or package, unless the container has been affixed with labels written in English or Kiswahili language specifying the following-
(a) identity of the hazardous waste;
(b) name and address of the generator of waste;
(c) net contents;
(d) normal storage stability and methods for safe storage;
(e) name and percentage by weight of other ingredients or half-life of radioactive material;
(f) warning or caution statements which may include all, some or any of the following as appropriate -
   (i) the word “WARNING” or “CAUTION”;
   (ii) the word “DANGER! Keep away from unauthorized persons”;
   (iii) the word “POISON” marked indelibly in red on white background; and
   (iv) a pictogram of a skull and crossbones;
(g) a statement of First Aid measures to be taken when hazardous waste is inhaled or ingested to including the antidote be taken and direction that a physician must be contacted immediately;
(h) adequate directions for handling should be included in accompanying leaflets including safety precautions in transporting, storage, and disposal of hazardous waste and measures for cleaning any equipment used; and
(i) directions for the disposal of the container and
hazardous waste in accordance with the Act and these Regulations.

(2) Without prejudice to the provisions of sub-regulation (1), the Minister may in giving effect to this regulation, require a person to comply with international requirements approved by the Council.

(3) The label referred to in sub-regulation (1) shall-
(a) be written in characters that are easily legible; and
(b) not contain warranties, guarantees and liability exclusion clauses inconsistent with the provisions of the Act or these Regulations.

(4) A person shall not use a vehicle or other conveyance as means for carrying hazardous waste unless such vehicle or conveyance is labelled in accordance with sub-regulation (1) (f).

(5) A person who-
(a) sells, offers for sale, uses, packs, stores or transports waste in a container or package that is not labelled in accordance with this regulation; or
(b) uses a vehicle or conveyance that is not labelled in accordance with these Regulations,
commits an offence and shall on conviction be liable to a fine of not less than shillings five million but not exceeding ten billion shillings or for imprisonment for a term not exceeding twelve years or to both.

PART V
IN-COUNTRY MOVEMENTS OF HAZARDOUS WASTE

15. The Minister may issue permits for in-country management of hazardous waste for the following activities-
(a) collection of hazardous waste;
(b) storage of hazardous waste;
(c) transportation of hazardous waste;
(d) owning or operating a plant, facility or site for recycling or recovery or re-use or treatment or disposal of hazardous waste.
16.(1) A person who intends to collect, store or transport hazardous waste shall apply for a permit to the Minister by filling Form No. 1 prescribed in the Fifth Schedule and submit it to the Council for consideration.

(2) A person who intends to own or operate a plant or facility or site for recycling or recovery or re-use or treatment or disposal of hazardous waste shall apply for a permit to the Minister by filling Form No. 3 prescribed in the Fifth Schedule and submit it to the Council for consideration.

17.(1) A person who intends to collect hazardous waste shall apply for a permit to the Minister by filling Form No. 1 prescribed in the Fifth Schedule and submitting to the Council with the following attachments:
   (a) business licence;
   (b) Certificate of Incorporation and Memorandum and Articles of Association in case of company;
   (c) Tax Identification Number (TIN) certificate;
   (d) business or company profile;
   (e) Inspection report by an Environmental Officer with regard to hazardous waste transfer station;
   (f) relevant permit from other Authorities;
   (g) upon renewal of licence, medical report of fitness for personnel involved in collection of waste in accordance with the Occupational Safety and Health Act and Tracking Form in Form No. 5 prescribed in the Fifth Schedule;
   (h) proof of payment of application fee prescribed by the Minister under the Environmental Management (Fees and Charges) Regulations; and
   (i) any other document which the Council may require.

(2) Where the requirements for application under sub-regulation (1) have been complied with, the Council shall—
   (a) direct the Applicant to pay permit charges as prescribed in the Environmental Management (Fees and Charges) Regulations; and
   (b) advise the Minister for issuance of the permit.
18. The Minister may issue a permit for collection of hazardous waste in Form No. 2 specified in the Fifth Schedule where he is satisfied that the Applicant has adequate and appropriate facilities and equipment to collect hazardous waste without causing significant damage to public health and the environment.

19. A person granted with permit to collect hazardous waste shall-

(a) use appropriate waste collection equipment taking into account the type of hazardous waste;
(b) ensure that the collection of hazardous waste from generation or transfer station is conducted in a manner that shall not cause scattering of waste, leaks or spillage;
(c) ensure that waste transfer station is labeled with appropriate and visible hazard symbols, provided with First Aid equipment and fire extinguisher according to the type of waste stored;
(d) ensure that at all times the waste transfer station is affixed by all necessary licences and permits from other relevant Authorities;
(e) provide adequate protective and safety gears to personnel involved in handling of hazardous waste;
(f) provide safe and secure seating facilities for personnel involved in vehicles used for collection of waste;
(g) provide basic training and information to personnel involved in the collection and handling of the hazardous waste at the waste transfer station;
(h) ensure that the waste -
   (i) is stored properly;
   (ii) is not exposed to direct sunlight, rain and wind; and
   (iii) which is waste oil and other liquid hazardous waste is stored in closed containers;
(i) provide annual medical check-up in accordance
Cap. 297

with the Occupational Safety and Health Act, and submit medical report of fitness to the Council;

(j) ensure that the waste is transported in a transport facility that is covered or a closed container at all times depending on the type of waste;

(k) provide biannual reports of the conduct of the collection activity to the Council;

(l) submit a Tracking Form in Form No. 5 prescribed in the Fifth Schedule to these Regulations, to the Council immediately upon completion of the collection operation; and

(m) comply with any condition which the Minister may impose.

Application requirements for permit to store hazardous waste

20.-(1) A person who intends to store hazardous waste shall apply for a permit to the Minister by filling Form No. 1 prescribed in the Fifth Schedule and submit to the Council with the following attachments-

(a) Environmental Impact Assessment (EIA) Environmental Audit Certificate;

(b) inspection report of the storage facility or site conducted by an Environmental Officer;

(c) business licence;

(d) Certificate of Incorporation and Memorandum and Articles of Association where the applicant is a company;

(e) Tax Identification Number (TIN) certificate;

(f) business or company profile;

(g) Emergency Response Plan;

(h) any relevant permit from other Authorities;

(i) upon renewal, a medical report of fitness for personnel involved in storage of waste in accordance with the Occupational Safety and Health Act, and Tracking Form Form No. 5 prescribed in the Fifth Schedule; and

(j) proof of payment of application fee prescribed by the Minister under the Environmental Management (Fees and Charges) Regulations.
(2) Where the requirements for application under sub-regulation (1) have been complied with, the Council shall—
(a) direct the Applicant to pay permit charges as prescribed in the Environmental Management (Fees and Charges) Regulations; and
(b) advise the Minister for issuance of the permit.

</table>

21. A Minister may issue a permit for storage of hazardous waste in Form No. 2 prescribed in the Fifth Schedule where he is satisfied that the Applicant has adequate and appropriate facilities and equipment to store hazardous waste without causing significant damage to public health and the environment.

22. A person who has been issued with a permit to store hazardous waste shall-
(a) provide biannual reports of the conduct of the storage activity;
(b) use an appropriate storage facility or site;
(c) where handling liquid hazardous waste, use closed containers of not less than twenty litres for packaging;
(d) ensure that storage facility is labeled with appropriate and visible hazard symbols, provided with First Aid equipment and fire extinguisher according to the type of waste stored;
(e) ensure that the storage facility is affixed with all necessary licences and permits from other relevant Authorities at all times;
(f) provide adequate protective and safety gears to personnel involved in handling the hazardous waste at the storage facility;
(g) ensure the waste -
   (i) is stored properly;
   (ii) is not exposed to direct sunlight, rain and wind; and
   (iii) which is waste oil and other liquid hazardous waste should be stored in
closed containers;

(h) provide annual medical check-up in accordance with the Occupational Safety and Health Act and submit medical report of fitness to the Council;

(i) provide basic training to staff on safe waste storage and handling of emergency cases or accidents;

(j) avoid underground storage tanks and underground piping of hazardous waste, where possible;

(k) ensure that during storage, height of stacked containers should be limited to ensure safety;

(l) submit Tracking Form in Form No. 5 prescribed in the Fifth Schedule to these Regulations, to the Council immediately upon completion of the storage operation; and

(m) comply with any condition which the Minister may impose.

23.-(1) A person who intends to transport hazardous waste shall apply for a permit to the Minister by filling Form No. 1 prescribed in the Fifth Schedule and submit it to the Council with the following attachments-

(a) business licence;

(b) Certificate of incorporation and Memorandum and Article of Associations in case of company;

(c) Taxpayer Identification Number (TIN) certificate;

(d) business or company profile;

(e) details on the mode of transportation and specifications;

(f) emergency response plan;

(g) relevant permit(s) from other Authorities.

(h) upon renewal, Tracking Form in Form No. 5 prescribed in the Fifth Schedule;

(i) medical report of fitness for personnel involved in transportation of waste; and

(j) proof of payment of application fee prescribed
by the Minister under the Environmental Management (Fees and Charges) Regulations.

(2) Where the requirements for application under sub-regulation (1) have been complied with, the Council shall–

(a) direct the Applicant to pay permit charges as prescribed in the Environmental Management (Fees and Charges) Regulations; and

(b) advise the Minister for issuance of the permit.

24. The Minister may issue a permit for transportation of hazardous waste in Form No. 2 prescribed in the Fifth Schedule to these Regulations where he is satisfied that the Applicant has adequate and appropriate facilities and equipment to transport hazardous waste without causing significant damage to public health and the environment.

25. A person who has been granted a permit to transport hazardous waste shall–

(a) use of appropriate means of transport taking into account the type of hazardous waste in order to avoid the waste spreading or noxious releases during transportation;

(b) ensure that each transport facility is labeled with appropriate hazard symbols, provided with First Aid equipment and fire extinguisher according to the type of waste carried;

(c) ensure that the waste consignment is accompanied by all necessary transport documents at all times together with permits and licences from other Authorities;

(d) use the shortest routes or routes presenting the lowest risk for the public and environment;

(e) provide adequate protective and safety gears to personnel involved in handling the hazardous waste;

(f) provide safe and secure seating facilities in the cabin for personnel involved during transportation of hazardous waste;
(g) ensure the waste is transported in a covered transport facility or closed container at all times depending on the type of waste;

(h) provide annual medical check-up and submit medical report of fitness to the Council;

(i) provide basic training to staff on safe waste transport and handling of emergency cases or accidents;

(j) submit Tracking Form in Form No. 5 prescribed in the Fifth Schedule to the Council upon completion of the collection operations; and

(k) comply with any condition which the Minister may impose.

26. A motor vehicle or other means of conveyance that has been permitted to transport hazardous waste shall be labelled at the back and on both sides with the warning or caution statements in accordance with international requirements approved by the Council including-

(i) the words “WARNING” or “CAUTION”;

(ii) the words “DANGER! Keep away from unauthorized persons”;

(iii) the words “POISON” marked indelibly in red or white background; and

(iv) a pictogram of a skull and crossbones;

27.-(1) A person who intends to own or operate treatment, recovery, reuse, recycling or disposal facility, plant or site shall apply to the Minister for a permit by filling Form No. 3 prescribed in the Fifth Schedule and submit it to the Council with the following attachments:

(a) Environmental Impact Assessment (EIA) or Environmental Audit Certificate;

(b) business licence;

(c) Certificate of Incorporation and Memorandum and Articles of Association, in case of a company;

(d) Taxpayer Identification Number (TIN) certificate;

(e) business or company profile;

(f) proof of land ownership or lease agreement and
(g) energy plan of the treatment plant, disposal facility or site;
(h) detailed description of the treatment plant disposal facility or site;
(i) relevant permits from other Authorities;
(j) Emergency Response Plan;
(k) renewal, Tracking Document in Form No. 5 prescribed in the Fifth Schedule;
(l) proof of payment of application fees as prescribed in the applicable Environmental Management (Fees and Charges) Regulations; and
(m) any other document which the Council may require.

(2) Where the Council has received an application made pursuant to this regulation and is satisfied that all requirements have been complied with, the Council shall–
(a) direct the Applicant to pay permit charges as prescribed in the Environmental Management (Fees and Charges) Regulations; and
(b) advise the Minister for issuance of the permit.

28. The Minister may issue a permit to own or operate treatment, recycling, reuse, or disposal facility, plant or site of hazardous waste in Form No. 4 prescribed in the Fourth Schedule where he is satisfied that the plant, facility or site is conducted in a relevant zoned site.

29. A person who has been granted a permit to own or operate treatment, recovery, reuse, recycling or disposal facility or plant or site shall -
(a) ensure that the treatment plant, disposal facility or site operation is conducted in a relevant zoned site;
(b) ensure that treatment plant, disposal facility or site is labeled with appropriate and visible hazard and
hazardous waste safety signs, provided with First Aid kit and fire extinguisher;
(c) ensure that treatment or disposal of appropriate type of hazardous waste is compatible with the treatment plant or disposal facility or site;
(d) ensure that there is proper handling and management of the treatment or disposal and in a manner that does not pose risk to the public and environment;
(e) provide adequate protective and safety gears to personnel involved in handling the hazardous waste;
(f) ensure the waste is stored properly and is not exposed to direct sunlight, rain and wind prior to the treatment or disposal operation;
(g) carry out an annual audit of the environmental performance of the plant, facility or site and submit a report to the Council;
(h) provide annual medical check-up in accordance with the Occupational Safety and Health Act, and submit medical report of fitness to the Council;
(i) provide basic training to staff involved in handling and disposal of hazardous waste;
(j) submit Tracking Form in Form No. 5 prescribed in the Fifth Schedule to the Council upon completion of the treatment operation; and
(k) comply with any condition which the Minister may impose.

30.- (1) A permit for in-country movement of hazardous waste issued under these Regulations for collection, storage, transportation, ownership or operating treatment, reuse, recovery, recycle or disposal facility or plant or site shall be valid for one year and may, upon application, be renewed by the Minister.
(2) The Minister may limit the validity of a permit issued under this regulation to a specific number of transactions.
31. Any person who deals with—
(a) collection of hazardous waste;
(b) storage of hazardous waste;
(c) transportation of hazardous waste;
(d) owning or operating facility, plant or site for treatment, recycling, reuse, recovery or disposal of hazardous waste without a permit issued under these Regulations, commits an offence and shall on conviction be liable to a fine of not less than five million shillings but not exceeding ten billion shillings or to imprisonment for a term not exceeding twelve years or to both.

PART VI
TRANSBOUNDARY MOVEMENT OF HAZARDOUS WASTE

32.- (1) The Director shall be the Focal Point and Competent Authority for the operation of the Prior Informed Consent procedure for the export, transit or other transboundary movement of hazardous waste in accordance with the provisions of the Basel Convention.

(2) The Director shall closely liase with the designated national authorities of other states under any international convention or arrangement to which the United Republic is a party and international organisations.

(3) The Director shall disseminate information on management of hazardous waste to the public.

33.- (1) A person who intends to export hazardous waste shall fill in triplicate Notification Document in Form 6 and Movement Document in Form 7 prescribed in the Fifth Schedule to these Regulations and submit it to the Council with the following attachments—
(a) a contract between the exporter and the importer specifying environmentally sound management of the wastes in question;
(b) a permit for collection or storage of hazardous waste, where applicable;
(c) a schedule of intended shipment of the hazardous waste;
(d) a proof of payment of application fees as prescribed in the Environmental Management (Fees and Charges) Regulations.

(2) Upon satisfaction that the requirements of the subregulation (1) have been complied with, the Council shall require the Applicant to pay the export charges as prescribed in the Environmental Management (Fees and Charges) Regulations and submit the application package to the Minister.

(3) Upon receipt of the application package from the Council, the Minister through the Director, shall notify the Competent Authority of the country of import and the country of transit, if any for consent.

34. Where consent is received from competent authorities of the State of import and transit, the Minister shall issue a hazardous waste export permit in Form No. 8 prescribed in the Fifth Schedule.

35. A person who has been granted an export permit shall ensure that-

(a) the export cargo only pass through the customs point of exit in accordance with the schedule of shipments declared in the Movement Document;

(b) the export cargo is packaged in accordance with international requirements approved by the Council;

(c) the export cargo is labeled in accordance with international requirements approved by the Council;

(d) the export cargo is not transported by inland waters except where it is generated from islands within the territorial jurisdiction of Tanzania; and

(e) the export permit is surrendered to the Custom Authorities at the point of exit.

36. The State of Export shall notify the Minister through the Director by submitting Notification Document in Form 6 and Movement Document in Form 7 prescribed in the
Environmental Management (Hazardous Waste Control and Management)

Fifth Schedule, attached with the following-
(a) a contract between Exporter and Importer specifying environmentally sound management of the wastes in question;
(b) a schedule of intended shipment of the hazardous waste;
(c) Certificate of incorporation;
(d) proof that the hazardous waste is generated from the State of Export; and
(e) proof of payment of application fees as prescribed in the Environmental Management (Fees and Charges) Regulations.

Import permit of hazardous waste

37. The Minister shall upon receiving the notification from the competent authorities of the State of Export, and being duly satisfied by the advice of the Director, issue consent and import permit in Form No. 9 prescribed in the Fifth Schedule.

Conditions for import permit of hazardous waste

38. A person who has been granted an import permit shall ensure that-
(a) the import cargo shall be packaged in accordance with international requirements approved by the Council;
(b) the import cargo shall be labeled in accordance with international requirements approved by the Council;
(c) import cargo shall not be transported by inland waters save for hazardous waste generated from islands within the territorial jurisdiction of Tanzania; and
(d) he holds other relevant permits from other authorities.

Application requirements

39.- (1) The State of Export shall notify the Minister through the Director by submitting duly filled Notification
Document in Form 6 and Movement Document in Form 7 both prescribed in the Fifth Schedule, with the following attachments:

(a) a contract between Exporter and Importer specifying environmentally sound management of the wastes in question;
(b) a schedule of intended shipment of the hazardous waste; and
(c) Emergency Response Plan.

(2) The Director shall where satisfied determine the escort charges of transit cargo and instruct the Applicant to pay the charges accordingly.

40. Where the Minister receives a notification from the competent authorities of the State of Export and the consent from the State of Import, the Minister shall issue the consent through the Movement Document; and transit permit in Form No. 10 prescribed in the Fifth Schedule.

41. A person who has been granted a transit permit shall ensure that-

(a) transit cargo that passes through the United Republic of Tanzania shall not be unloaded for repackaging;
(b) transit cargo shall only be transported through the customs point of entry and exit stipulated in the declared schedule of shipments
(c) the permit is surrendered to the Custom Authorities at the point of exit;
(d) transit cargo shall not be transported by inland waters;
(e) transit cargo shall be packaged in accordance with international requirements approved by the Council;
(f) transit cargo shall be labeled in accordance with international requirements approved by the Council; and
(g) he shall cover escort expenses for the transit cargo.
42. The Council shall submit a copy of the permits issued for transboundary movements of hazardous waste together with the Notification Document and Movement Document to the Commissioner of Customs and the Exports Controller.

43. Any permit for transboundary movement of hazardous waste issued under these Regulations shall relate to the specific transaction and shall not be valid for any subsequent transaction.

44.-(1) For the purpose of these Regulations, any transboundary movement of hazardous waste or other waste:
   (a) without notification to all States concerned;
   (b) without the consent of a State concerned;
   (c) with consent obtained from a State concerned through falsification, misrepresentation or fraud;
   (d) that does not conform in a material way with the documents; or
   (e) that results in deliberate disposal including dumping of hazardous waste or other waste in contravention of these Regulations and of general principles of international law,
   shall be deemed to be illegal traffic.

(2) Any illegal traffic of hazardous waste shall be taken back to the State of Export by the exporter, the generator or, where necessary, by itself into the State of Export.

(3) Notwithstanding the provisions of subregulation (2), any person who contravenes this Regulation commits an offence and shall on conviction be liable to a fine of not less than five million shillings but not exceeding ten billion shillings or to imprisonment for a term not exceeding twelve years or to both.

PART VII
HEALTH CARE WASTE

45. A person who generates health care waste shall at
the point of generation and at all stages thereafter segregate the waste in accordance with the categories provided under the Sixth Schedule.

46. Health care waste shall be securely packaged in containers approved by the Ministry responsible for health which shall be labelled with symbols and colour codes set out in Seventh Schedule.

47. A person who generates health care waste shall treat or cause to be treated all health care waste in the manner set out in the Eighth Schedule, before such health care waste is stored or disposed of.

48. Storage of health care waste shall be in accordance with relevant law governing the operation of health care facilities.

49. A person shall not transport health care waste without a permit issued by the Ministry responsible for health or the relevant local government authority.

50. The provisions of these Regulations relating to storage and transportation of health care waste shall apply to owners or operators of transfer stations.

51.- (1) The responsible department or unit in the Ministry responsible for health shall monitor the management of all health care waste to ensure such health waste is managed in a manner that may not adversely affect the environment and human health.

(2) Notwithstanding the provision of subregulation (1), the Council shall ensure compliance of these Regulations in the management of health care waste.

PART VIII
PESTICIDES, RADIOACTIVE AND CHEMICAL WASTE

52.- (1) Subject to sub-regulation (2), the management
of pesticides waste shall be in accordance with the Plant Protection Act, the Tanzania Pesticides Research Institute Act, the Veterinary Act and the Public Health Act.

(2) The Minister shall liaise with the Minister responsible for pesticides with a view to putting in place regulatory framework that will ensure that the treatment and disposal of pesticides waste complies with the requirement of the Act in relation to management of hazardous waste.

53.- (1) Management of radioactive waste shall be conducted at designated sites or facilities in manner approved by the Tanzania Atomic Energy Agency.

(2) The Atomic Energy Act and Regulations made thereunder shall apply in relation to the classification, registrations, labelling, packaging, transportation, importation, exportations, waste disposal and health and safety requirements with regard to radioactive waste.

54. Subject to the provisions of the Act, the management of industrial and consumer and chemical waste shall be conducted at designated sites or plant in accordance with the Industrial and Consumer Chemicals (Management and Control) Act.

PART IX
COMPLIANCE AND ENFORCEMENT

55.- (1) Where the Council or an Environmental Inspector or an officer of the Council has reasonable grounds to believe that, a person is or will be conducting an activity, or is or will be in possession or control of substances or anything that may result in violation of the provisions of these Regulations, he may serve a prevention order on that person.

(2) A person on whom a prevention order is served shall comply with the requirements of the order by the date or dates specified in the order and if no date is specified, that person shall comply with the order immediately.

(3) A person who contravenes a prevention order commits an offence and shall on conviction, be liable to a fine
of not less than five hundred thousand shillings or to imprisonment for a term not exceeding one year and where that person fails to comply with a requirement specified in the prevention order within the time specified, that person shall be liable to a further fine not exceeding one hundred thousand shillings for every day or part of a day after the date specified in the order during which the offence is continued.

56.-(1) Where an Environmental Inspector has reasonable grounds to believe that any condition of a licence or permit issued under these Regulations has been breached, he may serve a compliance order requiring that person to remedy the breach within a reasonable period stipulated in the order, failure of which the local government authority may cancel or revoke the licence or permit.

(2) Permits or licences issued under these Regulations to a person served with a compliance order stands cancelled or revoked seven days after the deadline set for compliance.

(3) In addition to revocation or cancellation of licence or Permit under sub regulation (2), a local government authority may take any further action it deems appropriate.

57. The Minister may suspend or revoke a permit issued under these Regulations where he is satisfied that—

(a) the conditions of the grant of the permit have not been complied with; or

(b) the continued operation of the activity is or is likely to be injurious to the environment and human health.

PART X
GENERAL PROVISIONS

58. A permit holder under these Regulations shall-

(a) keep record of permitted activity and all transactions related to it in Form No. 11 prescribed in the Fifth Schedule; and

(b) submit the record made under this regulation to the Council at interval of six months.
59.- (1) A person permitted to carry out any activity under these Regulations shall submit bi-annual reports on the conduct of the permitted activity to the Council in the manner set out in Form No. 12 prescribed in the Fifth Schedule.

(2) Where special reporting procedures are made the condition of a permit granted under these Regulations, those procedures shall take precedence over the submission of bi-annual reports.

60. Where any damage is caused by hazardous waste which has been deposited into the environment, a person who deposited, caused or permitted a waste to be deposited, is liable for the damage to the environment and human health.

61.- (1) The Director may, in a fitting case, require an applicant for a permit to subscribe to an insurance policy covering the risks likely to arise out of the activity for which the permit is required.

(2) Without prejudice to sub-regulation (2), an importer, exporter and transporter of hazardous waste shall subscribe to an insurance policy to cover risks likely to be caused to the environment and human health.

62. A permit for export of hazardous waste or other waste issued under these Regulations shall not be transferable.

63. An owner or operator of a hazardous waste treatment plant, recycling, recovery, reuse or disposal facility or site shall carry out annual self-environmental audit of the environmental performance of the plant or facility or site and shall submit a report to the Council.

64. Any person who contravenes these Regulations commits an offence and shall on conviction be liable to a fine of not less than five million shillings but not exceeding ten billion shillings or to imprisonment for a term not exceeding twelve years or to both.
65. The Council shall maintain a register of all permits issued under these Regulations.

66. A person aggrieved by any decision made under these Regulations may appeal in accordance with the provisions of the Act.

67. The Minister may issue guidelines or orders to facilitate effective implementation of these Regulations.

68. The Minister may amend Schedules to these Regulations.

70. The Environmental Management (Hazardous Waste Control and Management) Regulations of 2009 are hereby repealed.
SCHEDULES

FIRST SCHEDULE

(Made under regulation 12)

WASTES STREAMS

This Schedule lists the categories of wastes to be controlled under these Regulations, including both specific waste categories (Y1 to Y18) and wastes having specific constituents (Y19 to Y45).

| Y1   | Clinical wastes from medical care in hospitals, medical centers and clinics |
| Y2   | Wastes from the production and preparation of pharmaceutical products     |
| Y3   | Waste pharmaceuticals, drugs and medicines                                |
| Y4   | Wastes from the production, formulation and use of biocides and phytopharmaceuticals |
| Y5   | Wastes from the manufacture, formulation and use of wood preserving chemicals |
| Y6   | Wastes from the production, formulation and use of organic solvents       |
| Y7   | Wastes from heat treatment and tempering operations containing cyanides   |
| Y8   | Waste mineral oils unfit for their originally intended use                |
| Y9   | Waste oils/water, hydrocarbons/water mixtures, emulsions                 |
| Y10  | Waste substances and articles containing or contaminated with polychlorinated biphenyls (PCBs) and/or polychlorinated terphenyls (PCTs) and/or polybrominated biphenyls (PBBs) |
| Y11  | Waste tarry residues arising from refining, distillation and any pyrolytic treatment |
| Y12  | Wastes from production, formulation and use of inks, dyes, pigments, paints, lacquers, varnish |
| Y13  | Waste from production, formulation and use of resins, latex, plasticizers, glues/adhesives |
| Y14  | Waste chemical substances arising from research and development or teaching activities which are not identified and/or are new and whose effects on man and/or the environment are not known |
| Y15  | Wastes of an explosive nature not subject to other legislation           |
| Y16  | Wastes from production, formulation and use of photographic chemicals and processing materials |
| Y17  | Wastes resulting from surface treatment of metals and plastics           |
| Y18  | Residues arising from industrial waste disposal operations              |

Wastes having as constituents:
Categories of wastes requiring special consideration

Y46 Wastes collected from households
Y47 Residues arising from the incineration of household wastes
SECOND SCHEDULE

(Made under regulation 12)

A1 Metal and metal-bearing wastes

A1010 Metal wastes and waste consisting of alloys of any of the following:
- Antimony
- Arsenic
- Beryllium
- Cadmium
- Lead
- Mercury
- Selenium
- Tellurium
- Thallium
  but excluding such wastes specifically listed on list B.

A1020 Waste having as constituents or contaminants, excluding metal waste in massive form, any of the following:
- Antimony; antimony compounds
- Beryllium; beryllium compounds
- Cadmium; cadmium compounds
- Lead; lead compounds
- Selenium; selenium compounds
- Tellurium; tellurium compounds

A1030 Wastes having as constituents or contaminants any of the following:
- Arsenic; arsenic compounds
- Mercury; mercury compounds
- Thallium; thallium compounds

A1040 Wastes having as constituents any of the following:
- Metal carbonyls
- Hexavalent chromium compounds

A1050 Galvanic sludges

A1060 Waste liquors from the pickling of metals

A1070 Leaching residues from zinc processing, dust and sludge such as jarosite, hematite, etc.

A1080 Waste zinc residues not included on list B, containing lead and cadmium in concentrations sufficient to exhibit Annex III characteristics

A1090 Ashes from the incineration of insulated copper wire

A1100 Dusts and residues from gas cleaning systems of copper smelters

A1110 Spent electrolytic solutions from copper electro refining and electro winning operations

A1120 Waste sludge, excluding anode slimes, from electrolyte purification systems in
copper electrorefining and electrowinning operations
A1130  Spent etching solutions containing dissolved copper
A1140  Waste cupric chloride and copper cyanide catalysts
A1150  Precious metal ash from incineration of printed circuit boards not included on list B
A1160  Waste lead-acid batteries, whole or crushed
A1170  Unsorted waste batteries excluding mixtures of only list B batteries. Waste batteries not specified on list B containing Annex I constituents to an extent to render them hazardous
A1180  Waste electrical and electronic assemblies or scrap containing components such as accumulators and other batteries included on list A, mercury-switches, glass from cathode-ray tubes and other activated glass and PCB-capacitors, or contaminated with Annex I constituents (e.g., cadmium, mercury, lead, polychlorinated biphenyl) to an extent that they possess any of the characteristics contained in Annex III (note the related entry on list B B1110)²
A1190  Waste metal cables coated or insulated with plastics containing or contaminated with coal tar, PCB³, lead, cadmium, other organohalogen compounds or other Annex I constituents to an extent that they exhibit Annex III characteristics.

A2 Wastes containing principally inorganic constituents, which may contain metals and organic materials
A2010  Glass waste from cathode-ray tubes and other activated glasses
A2020  Waste inorganic fluorine compounds in the form of liquids or sludge but excluding such wastes specified on list B
A2030  Waste catalysts but excluding such wastes specified on list B
A2040  Waste gypsum arising from chemical industry processes, when containing Annex I constituents to the extent that it exhibits an Annex III hazardous characteristic (note the related entry on list B B2080)
A2050  Waste asbestos (dusts and fibres)
A2060  Coal-fired power plant fly-ash containing Annex I substances in concentrations sufficient to exhibit Annex III characteristics (note the related entry on list B B2050)

A3 Wastes containing principally organic constituents, which may contain metals and inorganic materials

</tbody>
</table>
A3200 Bituminous material (asphalt waste) from road construction and maintenance, containing tar (note the related entry on list B, B2130)

A4 Wastes which may contain either inorganic or organic constituents

A4010 Wastes from the production, preparation and use of pharmaceutical products but excluding such wastes specified on list B

A4020 Clinical and related wastes; that is wastes arising from medical, nursing, dental, veterinary, or similar practices, and wastes generated in hospitals or other facilities during the investigation or treatment of patients, or research projects

A4030 Wastes from the production, formulation and use of biocides and phytopharmaceuticals, including waste pesticides and herbicides which are off-specification, outdated, or unfit for their originally intended use

A4040 Wastes from the manufacture, formulation and use of wood-preserving chemicals

A4050 Wastes that contain, consist of or are contaminated with any of the following:
- Inorganic cyanides, excepting precious-metal-bearing residues in solid form containing traces of inorganic cyanides
- Organic cyanides

A4060 Waste oils/water, hydrocarbons/water mixtures, emulsions

A4070 Wastes from the production, formulation and use of inks, dyes, pigments, paints, lacquers, varnish excluding any such waste specified on list B (note the related entry on list B B4010)

A4080 Wastes of an explosive nature (but excluding such wastes specified on list B)

A4090 Waste acidic or basic solutions, other than those specified in the corresponding entry on list B (note the related entry on list B B2120)

A4100 Wastes from industrial pollution control devices for cleaning of industrial off-gases but excluding such wastes specified on list B

A4110 Wastes that contain, consist of or are contaminated with any of the following:
- Any congenor of polychlorinated dibenzo-furan
- Any congenor of polychlorinated dibenzo-dioxin

A4120 Wastes that contain, consist of or are contaminated with peroxides

A4130 Waste packages and containers containing Annex I substances in concentrations sufficient to exhibit Annex III hazard characteristics

5 “Outdated” means unused within the period recommended by the manufacturer.

6 This entry does not include wood treated with wood preserving chemicals.
Environmental Management (Hazardous Waste Control and Management)

A4140 Waste consisting of or containing off specification or outdated\(^7\) chemicals corresponding to Annex I categories and exhibiting Annex III hazard characteristics

A4150 Waste chemical substances arising from research and development or teaching activities which are not identified and/or are new and whose effects on human health and/or the environment are not known

A4160 Spent activated carbon not included on list B (note the related entry on list B B2060)
THIRD SCHEDULE

(Made under regulation 12)

B1 Metal and metal-bearing wastes

B1010 Metal and metal-alloy wastes in metallic, non-dispersible form:
- Precious metals (gold, silver, the platinum group, but not mercury)
- Iron and steel scrap
- Copper scrap
- Nickel scrap
- Aluminium scrap
- Zinc scrap
- Tin scrap
- Tungsten scrap
- Molybdenum scrap
- Tantalum scrap
- Magnesium scrap
- Cobalt scrap
- Bismuth scrap
- Titanium scrap
- Zirconium scrap
- Manganese scrap
- Germanium scrap
- Vanadium scrap
- Scrap of hafnium, indium, niobium, rhenium and gallium
- Thorium scrap
- Rare earths scrap
- Chromium scrap

B1020 Clean, uncontaminated metal scrap, including alloys, in bulk finished form (sheet, plate, beams, rods, etc), of:
- Antimony scrap
- Beryllium scrap
- Cadmium scrap
- Lead scrap (but excluding lead-acid batteries)
- Selenium scrap
- Tellurium scrap
### Refractory Metals Containing Residues

**B1030** Refractory metals containing residues

**B1031** Molybdenum, tungsten, titanium, tantalum, niobium, and rhenium metal and metal alloy wastes in metallic dispersible form (metal powder), excluding such wastes as specified in list A under entry A1050, galvanic sludge.

**B1040** Scrap assemblies from electrical power generation not contaminated with lubricating oil, PCB or PCT to an extent to render them hazardous.

**B1050** Mixed non-ferrous metal, heavy fraction scrap, not containing Annex I materials in concentrations sufficient to exhibit Annex III characteristics.

**B1060** Waste selenium and tellurium in metallic elemental form including powder.

**B1070** Waste of copper and copper alloys in dispersible form, unless they contain Annex I constituents to an extent that they exhibit Annex III characteristics.

**B1080** Zinc ash and residues including zinc alloys residues in dispersible form unless containing Annex I constituents in concentration such as to exhibit Annex III characteristics or exhibiting hazard characteristic H4.3.

**B1090** Waste batteries conforming to a specification, excluding those made with lead, cadmium, or mercury.

**B1100** Metal-bearing wastes arising from melting, smelting and refining of metals:

- Hard zinc spelter
- Zinc-containing drosses:
  - Galvanizing slab zinc top dross (>90% Zn)
  - Galvanizing slab zinc bottom dross (>92% Zn)
  - Zinc die casting dross (>85% Zn)
  - Hot dip galvanizers slab zinc dross (batch) (>92% Zn)
  - Zinc skimmings
- Aluminium skimmings (or skims) excluding salt slag
- Slags from copper processing for further processing or refining not containing arsenic, lead, or cadmium to an
extent that they exhibit Annex III hazard characteristics

- Wastes of refractory linings, including crucibles, originating from copper smelting
- Slags from precious metals processing for further refining
- Tantalum-bearing tin slags with less than 0.5% tin

**B1110** Electrical and electronic assemblies:

- Electronic assemblies consisting only of metals or alloys
- Waste electrical and electronic assemblies or scrap (including printed circuit boards) not containing components such as accumulators and other batteries included on list A, mercury-switches, glass from cathode-ray tubes and other activated glass and PCB-capacitors, or not contaminated with Annex I constituents (e.g., cadmium, mercury, lead, polychlorinated biphenyl) or from which these have been removed, to an extent that they do not possess any of the characteristics contained in Annex III (note the related entry on list A A1180)
- Electrical and electronic assemblies (including printed circuit boards, electronic components and wires) destined for direct reuse, and not for recycling or final disposal

**B1115** Waste metal cables coated or insulated with plastics, not included in list A1190, excluding those destined for Annex IVA operations or any other disposal operations involving, at any stage, uncontrolled thermal processes, such as open-burning.

**B1120** Spent catalysts excluding liquids used as catalysts, containing any of:

<table>
<thead>
<tr>
<th>Transition metals, excluding waste catalysts (spent catalysts, liquid used catalysts or other catalysts) on list A:</th>
<th>Scandium</th>
<th>Vanadium</th>

**B1130** Cleaned spent precious-metal-bearing catalysts

**B1140** Precious-metal-bearing residues in solid form which contain traces of inorganic cyanides

**B1150** Precious metals and alloy wastes (gold, silver, the platinum group, but not mercury) in a dispersible, non-liquid form with appropriate packaging and labelling

**B1160** Precious-metal ash from the incineration of printed circuit boards

**B1170** Precious-metal ash from the incineration of photographic film

**B1180** Waste photographic film containing silver halides and metallic silver

**B1190** Waste photographic paper containing silver halides and metallic silver

**B1200** Granulated slag arising from the manufacture of iron and steel

**B1210** Slag arising from the manufacture of iron and steel including slags as a source of TiO$_2$ and vanadium

**B1220** Slag from zinc production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301) mainly for construction

**B1230** Mill scaling arising from the manufacture of iron and steel

**B1240** Copper oxide mill-scale

**B1250** Waste end-of-life motor vehicles, containing neither liquids nor other hazardous components

### B2 Wastes containing principally inorganic constituents, which may contain metals and organic materials

**B2010** Wastes from mining operations in non-dispersible form:

- Natural graphite waste
- Slate waste, whether or not roughly trimmed or merely cut, by sawing or otherwise
- Mica waste
- Leucite, nepheline and nepheline syenite waste
- Feldspar waste
Environmental Management (Hazardous Waste Control and Management)

GN NO. 676 (contd)

- Fluorspar waste
- Silica wastes in solid form excluding those used in foundry operations

### B2020 Glass waste in non-dispersible form:
- Cullet and other waste and scrap of glass except for glass from cathode-ray tubes and other activated glasses

### B2030 Ceramic wastes in non-dispersible form:
- Cermet wastes and scrap (metal ceramic composites)
- Ceramic based fibres not elsewhere specified or included

### B2040 Other wastes containing principally inorganic constituents:
- Partially refined calcium sulphate produced from flue-gas desulphurization (FGD)
- Waste gypsum wallboard or plasterboard arising from the demolition of buildings
- Slag from copper production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301 and DIN 8201) mainly for construction and abrasive applications
- Sulphur in solid form
- Limestone from the production of calcium cyanamide (having a pH less than 9)
- Sodium, potassium, calcium chlorides
- Carborundum (silicon carbide)
- Broken concrete
- Lithium-tantalum and lithium-niobium containing glass scraps

### B2050 Coal-fired power plant fly-ash, not included on list A (note the related entry on list A A2060)

### B2060 Spent activated carbon not containing any Annex I constituents to an extent they exhibit Annex III characteristics, for example, carbon resulting from the treatment of potable water and processes of the food industry and vitamin production (note the related entry on list A, A4160)

### B2070 Calcium fluoride sludge

### B2080 Waste gypsum arising from chemical industry processes not included on list A (note the related entry on list A A2040)

### B2090 Waste anode butts from steel or aluminium production made of petroleum coke or bitumen and cleaned to normal industry specifications (excluding anode butts from chlor alkali electrolyses and from metallurgical industry)

### B2100 Waste hydrates of aluminium and waste alumina and residues from alumina production excluding such materials used for gas cleaning,
flocculation or filtration processes

B2110  Bauxite residue (“red mud”) (pH moderated to less than 11.5)
B2120  Waste acidic or basic solutions with a pH greater than 2 and less
       than 11.5, which are not corrosive or otherwise hazardous (note the
       related entry on list A, A4090)
B2130  Bituminous material (asphalt waste) from road construction and
       maintenance, not containing tar\textsuperscript{13} (note the related entry on list A,
       A3200)

\textbf{B3 Wastes containing principally organic constituents, which may contain metals and
inorganic materials}

\textbf{B3010}  Solid plastic waste:
The following plastic or mixed plastic materials, provided they are
not mixed with other wastes and are prepared to a specification:
\begin{itemize}
  \item Scrap plastic of non-halogenated polymers and co-polymers,
  \begin{itemize}
    \item ethylene
    \item styrene
    \item polypropylene
    \item polyethylene terephthalate
    \item acrylonitrile
    \item butadiene
    \item polyacetsals
    \item polyamides
    \item polyacetyle terephthalate
    \item polycarbonates
    \item polyethers
    \item polyphenylene sulphides
    \item acrylic polymers
    \item alkanes C10-C13 (plasticiser)
    \item polyurethane (not containing CFCs)
    \item polysiloxanes
    \item polymethyl methacrylate
    \item polyvinyl alcohol
    \item polyvinyl butyral
    \item polyvinyl acetate
  \end{itemize}
  \begin{itemize}
    \item Cured waste resins or condensation products including the
      following:
      \begin{itemize}
        \item urea formaldehyde resins
        \item phenol formaldehyde resins
      \end{itemize}
  \end{itemize}
\end{itemize}

\textsuperscript{13} The concentration level of Benzol (a) pyrene should not be 50mg/kg or more.
\textsuperscript{14} It is understood that such scraps are completely polymerized.
- melamine formaldehyde resins
- epoxy resins
- alkyd resins
- polyamides
  • The following fluorinated polymer wastes\(^{15}\)
    - perfluoroethylene/propylene (FEP)
    - perfluor alkoxyl alkane
    - tetrafluoroethylene/per fluor vinyl ether (PFA)
    - tetrafluoroethylene/per fluoro methylvinyl ether (MFA)
    - polyvinylflouride (PVF)
    - polyvinylidenefluoride (PVDF)

B3020 Paper, paperboard and paper product wastes

The following materials, provided they are not mixed with hazardous wastes:

  Waste and scrap of paper or paperboard of:
  • unbleached paper or paperboard or of corrugated paper or paperboard
  • other paper or paperboard, made mainly of bleached chemical pulp, not coloured in the mass
  • paper or paperboard made mainly of mechanical pulp (for example, newspapers, journals and similar printed matter)
  • other, including but not limited to 1) laminated paperboard
  2) unsorted scrap

B3030 Textile wastes

The following materials, provided they are not mixed with other wastes and are prepared to a specification:

• Silk waste (including cocoons unsuitable for reeling, yarn waste and garnetted stock)
  - not carded or combed
  - other
• Waste of wool or of fine or coarse animal hair, including yarn waste but excluding garnetted stock
  - noils of wool or of fine animal hair
  - other waste of wool or of fine animal hair
  - waste of coarse animal hair
• Cotton waste (including yarn waste and garnetted stock)
  - yarn waste (including thread waste)
  - garnetted stock

\(^{15}\) Post-consumer wastes are excluded from this entry:

- Wastes shall not be mixed
- Problems arising from open-burning practices to be considered
- other
  - Flax tow and waste
  - Tow and waste (including yarn waste and garnetted stock) of true hemp (Cannabis sativa L.)
  - Tow and waste (including yarn waste and garnetted stock) of jute and other textile bast fibres (excluding flax, true hemp and ramie)
  - Tow and waste (including yarn waste and garnetted stock) of sisal and other textile fibres of the genus Agave
  - Tow, noils and waste (including yarn waste and garnetted stock) of coconut
  - Tow, noils and waste (including yarn waste and garnetted stock) of abaca (Manila hemp or Musa textilis Nee)
  - Tow, noils and waste (including yarn waste and garnetted stock) of ramie and other vegetable textile fibres, not elsewhere specified or included
  - Waste (including noils, yarn waste and garnetted stock) of man-made fibres
    - of synthetic fibres
    - of artificial fibres
  - Worn clothing and other worn textile articles
  - Used rags, scrap twine, cordage, rope and cables and worn out articles of twine, cordage, rope or cables of textile materials
    - sorted
    - other

B3035 Waste textile floor coverings, carpets
B3040 Rubber wastes
   The following materials, provided they are not mixed with other wastes:
   - Waste and scrap of hard rubber (e.g., ebonite)
   - Other rubber wastes (excluding such wastes specified elsewhere)

B3050 Untreated cork and wood waste:
   - Wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms
   - Cork waste: crushed, granulated or ground cork

B3060 Wastes arising from agro-food industries provided it is not infectious:
   - Wine lees
   - Dried and sterilized vegetable waste, residues and by-products, whether or not in the form of pellets, of a kind used in animal feeding, not elsewhere specified or included
   - Degras: residues resulting from the treatment of fatty substances or animal or vegetable waxes
Environmental Management (Hazardous Waste Control and Management)

GN No. 676 (contd)

- Waste of bones and horn-cores, unworked, defatted, simply prepared (but not cut to shape), treated with acid or degelatinised
- Fish waste
- Cocoa shells, husks, skins and other cocoa waste
- Other wastes from the agro-food industry excluding by-products which meet national and international requirements and standards for human or animal consumption

B3065 Waste edible fats and oils of animal or vegetable origin (e.g. frying oils), provided they do not exhibit an Annex III characteristic

B3070 The following wastes:
- Waste of human hair
- Waste straw
- Deactivated fungus mycelium from penicillin production to be used as animal feed

B3080 Waste parings and scrap of rubber

B3090 Paring and other wastes of leather or of composition leather not suitable for the manufacture of leather articles, excluding leather sludges, not containing hexavalent chromium compounds and biocides (note the related entry on list A A3100)

B3100 Leather dust, ash, sludges or flours not containing hexavalent chromium compounds or biocides (note the related entry on list A A3090)

B3110 Fellmongery wastes not containing hexavalent chromium compounds or biocides or infectious substances (note the related entry on list A A3110)

B3120 Wastes consisting of food dyes

B3130 Waste polymer ethers and waste non-hazardous monomer ethers incapable of forming peroxides

B3140 Waste pneumatic tyres, excluding those destined for Annex IVA operations

B4 Wastes which may contain either inorganic or organic constituents

B4010 Wastes consisting mainly of water-based/latex paints, inks and hardened varnishes not containing organic solvents, heavy metals or biocides to an extent to render them hazardous (note the related entry on list A A4070)

B4020 Wastes from production, formulation and use of resins, latex, plasticizers, glues/adhesives, not listed on list A, free of solvents and other contaminants to an extent that they do not exhibit Annex III characteristics, e.g., water-based, or glues based on casein starch, dextrin, cellulose ethers, polyvinyl alcohols (note the related entry on list A A3050)
### FOURTH SCHEDULE

(Made under regulation 16 (1))

**LIST OF HAZARDOUS CHARACTERISTICS**

<table>
<thead>
<tr>
<th>UN Class</th>
<th>Code</th>
<th>Characteristics</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>H1</td>
<td>Explosive</td>
</tr>
</tbody>
</table>

An explosive substance or waste is a solid or liquid substance or waste (or mixture of substances or wastes) which is in itself capable by chemical reaction of producing gas at such a temperature and pressure and at such a speed as to cause damage to the surroundings.

| 3        | H3   | Flammable liquids |

The word “flammable” has the same meaning as “inflammable”. Flammable liquids are liquids, or mixtures of liquids, or liquids containing solids in solution or suspension (for example, paints, varnishes, lacquers, etc., but not including substances or wastes otherwise classified on account of their dangerous characteristics) which give off a flammable vapour at temperatures of not more than 60.5°C, closed-cup test, or not more than 65.6°C, open-cup test. (Since the results of open-cup tests and of closed-cup tests are not strictly comparable and even individual results by the same test are often variable, regulations varying from the above figures to make allowance for such differences would be within the spirit of this definition.)

| 4.1      | H4.1 | Flammable solids |

Solids, or waste solids, other than those classed as explosives, which under conditions encountered in transport are readily combustible, or may cause or
4.2 H4.2 Substances or wastes liable to spontaneous combustion
Substances or wastes which are liable to spontaneous heating under normal conditions encountered in transport, or to heating up on contact with air, and being then liable to catch fire.

4.3 H4.3 Substances or wastes which, in contact with water emit flammable gases
Substances or wastes which, by interaction with water, are liable to become spontaneously flammable or to give off flammable gases in dangerous quantities.

5.1 H5.1 Oxidizing
Substances or wastes which, while in themselves not necessarily combustible, may, generally by yielding oxygen cause, or contribute to, the combustion of other materials.

5.2 H5.2 Organic Peroxides
Organic substances or wastes which contain the bivalent-o-o-structure are thermally unstable substances which may undergo exothermic self-accelerating decomposition.

6.1 H6.1 Poisonous (Acute)
Substances or wastes liable either to cause death or serious injury or to harm human health if swallowed or inhaled or by skin contact.

6.2 H6.2 Infectious substances
Substances or wastes containing viable microorganisms or their toxins which are known or suspected to cause disease in animals or humans.

8 H8 Corrosives
Substances or wastes which, by chemical action, will cause severe damage when in contact with living tissue, or, in the case of leakage, will materially damage, or even destroy, other goods or the means of transport; they may also cause other hazards.

9 H10 Liberation of toxic gases in contact with air or water
Substances or wastes which, by interaction with air or water, are liable to give off toxic gases in dangerous quantities.

9 H11 Toxic (Delayed or chronic)
Substances or wastes which, if they are inhaled or
ingested or if they penetrate the skin, may involve delayed or chronic effects, including carcinogenicity.

9 H12 Ecotoxic
Substances or wastes which if released present or may present immediate or delayed adverse impacts to the environment by means of bioaccumulation and/or toxic effects upon biotic systems.

9 H13 Capable, by any means, after disposal, of yielding another material, e.g., leachate, which possesses any of the characteristics listed above.

FIFTH SCHEDULE

(Made under regulation 16 (1))

FORMS
(To be completed in triplicate) Form No. 1

THE UNITED REPUBLIC OF TANZANIA
VICE PRESIDENT’S OFFICE

APPLICATION/RENEWAL FOR A PERMIT FOR ............................................. OF HAZARDOUS WASTE*

I hereby apply for a permit to collect/store/transport hazardous waste. The particulars of the application are given below:

Name and physical address of Applicant.................................................................

TIN Number ........................................................................................................

Type of hazardous waste......................................................................................
Source of hazardous waste.................................................................
Mode of hazardous waste collection....................................................
Location(s) and size (in square meters) of the waste storage facility, if any.
If handling liquid hazardous waste, specify type and size of containers to be used.
Collection schedule ...........................................................................
Intended Recipient(s) of the hazardous waste......................................
Any other relevant information.............................................................
Is Application for: Initial permit Renewal
Previous Permit Number ....................................................................

Date: .............................................. Signature: ..............................
Designation/Title: ..............................................................................

FOR OFFICIAL USE ONLY

Application received by ........................................ on ......................... 20........
Application Fee paid Tshs................................. (in words)......................

* Please fill the intended activity for which the permit is sought. This includes collection or storage or transportation of hazardous waste.
PERMIT TO .................................................. HAZARDOUS WASTE*

(Issued pursuant to regulations 18, 21 and 24 of the Environmental Management (Hazardous Waste Control and Management) Regulations of 2019)

Permit No....................

This is to certify that

……………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………
I hereby apply for a permit to own/operate treatment plant or disposal facility or site for hazardous waste. The particulars of the application are given below:

Name and physical address of Applicant…………………………………………………………..

TIN Number ………………………………………………………………………………………..

Location and district of plant/facility/site ……………………………………………………………

Approval of Town/Country Planning Authority………………………………………………

Description of types of hazardous waste to be treated/ disposed of at plant/facility/site…………

Capacity of the treatment or disposal facility per annum (tonnes)………………………………

Type of treatment option to be used for:

(a) Recovery and reclamation……………………………………………………………………

(b) Recycling…………………………………………………………………………………………

Type of hazardous waste disposal option:

(a) Containment in impermeable layers…………………………………………………………

(b) Solidification ……………………………………………………………………………………

(c) Sanitary land filling ……………………………………………………………………………
(d) Land filling
(e) Decontamination
(f) Incineration

Other (specify) 

Estimated life span of plant/site (include plan or designs) 

Approved energy plan (dated) (Attached copy) 

Executive summary of Environmental Impact Statement or Environmental Audit (please attach)

Is Application for: Initial permit Renewal

Previous Permit Number (for renewal) 

E.I.A or Environmental Audit Certificate Number 

Any other information 

Date: Signature:

Designation/Title: 

FOR OFFICIAL USE ONLY

Application received by 
on.20....

Fee paid TShs. (in words) 

*Please fill in the intended activity for which the permit is sought. This includes treatment or recovery or re-use or recycling or disposal of hazardous waste.
Form No. 4

THE UNITED REPUBLIC OF TANZANIA
VICE PRESIDENT’S OFFICE

PERMIT TO OWN/OPERATE PLANT/ FACILITY/ SITE FOR
.................................................................HAZARDOUS WASTE

(Issued pursuant to regulation 28 of the Environmental Management (Hazardous Waste Control and Management) Regulations of 2019)

Permit No......................

This is to certify that ........................................ of P.O Box................ has been granted a permit to own/operate a plant/facility/site for ................................ of Hazardous waste at ..........................................................(Plot No., town, ward, district, region) in Mainland Tanzania.

This permit is valid for a period of twelve months starting from ...............to............... unless revoked or suspended.

Terms and conditions for this permit are set out overleaf.

Name.........................
Date...........................
Signature.......................

Minister Responsible for Environment

*Please fill in the intended activity for which the permit is granted. This includes treatment or recovery or recycling or disposal of hazardous waste.
THE UNITED REPUBLIC OF TANZANIA

PERMIT FOR EXPORT OF HAZARDOUS WASTE

(Issued pursuant to regulation 34 of the Environmental Management (Hazardous Waste Control and Management) Regulations of 2019)

Permit No: ..................

This is to certify that .............................................. of P. O. Box ........................................... has been granted a permit to export ...................................................... (type of hazardous waste) to .................................................. (name of the country of import) with a quantity or volume of ................................................. (tonnes or litres).

This permit shall relate to the specific export transaction and intended schedule of shipment declared in the Movement Document, unless revoked or suspended.

The permit shall not be valid for any subsequent export transaction.

Terms and conditions for this permit are set out overleaf.

Name: ..................

Date: ..................

Signature: ..................

Minister responsible for Environment
PERMIT FOR IMPORT OF HAZARDOUS WASTE

(Issued pursuant to regulation 37 of the Environmental Management (Hazardous Waste Control and Management) Regulations of 2019)

Permit No...................…….

This is to certify that ………………………..................................……of P. O. Box…………………………………… has been granted a permit to import……………………………………………….(type of hazardous waste) to Mainland Tanzania with a quantity or volume of ……………………………………….(tonnes or litres).

This permit shall relate to the specific import transaction and intended schedule of shipment declared in the Movement Document, unless revoked or suspended.

The permit shall not be valid for any subsequent import transaction.

Terms and conditions for this permit are set out overleaf.

Name……………………..

Date………………………

Minister responsible for Environment
THE UNITED REPUBLIC OF TANZANIA
VICE PRESIDENT’S OFFICE

PERMIT FOR TRANSIT OF HAZARDOUS WASTE

(Issued pursuant to regulation 40 of the Environmental Management (Hazardous Waste Control and Management) Regulations of 2019)

Permit No........................

This is to certify that

.....................................................................................................................

of P. O. Box...................................... has been granted a permit to transit

..................................................................................................................... (type of hazardous waste) through

Mainland Tanzania at ........................................(entry point) and ........................................(exit point) with a quantity or volume of ...........................................

(tonnes or litres).

This permit shall relate to the specific transit transaction and intended schedule of shipment declared in the Movement Document, unless revoked or suspended.

The permit shall not be valid for any subsequent transit transaction.

Terms and conditions for this permit are set out overleaf.

Name............................................................

Date.................................

Signature.................................

Form No. 12

FORMAT OF THE BI-ANNUAL REPORT
(Made under regulation 59)

1) Introduction
   - This Chapter shall provide general profile of the business or company including location, main activities, employees, annual turnover, and permits and licenses.

2) Hazardous waste management
   - This Chapter shall describe the type and amount of hazardous waste being handled, source and recipient of waste.
   - It may also indicate trend in amount of hazardous waste handled over the past years since the operation of the business or company.

3) Challenges
   - This Chapter shall highlight challenges being encountered in the permitted activity.

4) Comments or Recommendations, if any

5) Attachments
• The permit holder shall attach the following documents:
  i) business licence;
  ii) Certificate of Incorporation and Memorandum and Articles of Association, in case of a company;
  iii) Tax clearance form;
  iv) relevant contract agreements;
  v) relevant permit(s) from other Authorities;
  vi) Emergency Response Plan;
  vii) Tracking Document; and
  viii) Form of records.

SIXTH SCHEDULE

(Made under regulation 45)

CATEGORIES OF HEALTH CARE WASTE

<td></td>
<td>waste containing cytostatic drug (often used in cancer.</td>
</tr>
</tbody>
</table>
### Chemical waste

Waste containing chemical substances e.g. laboratory reagents; film developer, disinfectants, (disinfectants) that are expired or no longer needed solvents.

### Wast with high content of heavy metals

Batteries, broken thermometers, blood-pressures gauges, etc.

### Pressurizes containers

Gas cylinders, gas cartridges, aerosol cans.

### Radioactive waste

Waste containing radioactive substances e.g. unused liquids from radiotherapy or laboratory research, contaminated glassware, packages, or absorbent paper, urine and excreta from patients treated or tested with unsealed radionuclides, sealed sources.

### General solid waste

Waste generated from offices, kitchens, packaging material from stores.

### Microorganisms

Any biological entity, cellular or non-cellular capable or replication or of transferring genetic material.

---

### SEVENTH SCHEDULE

(Made under regulation 46)

COLOUR CODE FOR HEALTH CARE WASTE ADOPTED FROM THE World Health Organisation COLOUR CODE

<table>
<thead>
<tr>
<th>Type</th>
<th>Colour of Container and markings</th>
<th>Type of Container</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Infections</td>

<td>Puncture proof</td>
</tr>
<tr>
<td>4. Chemical and Pharmaceutical</td>
<td>Brown</td>
<td>Plastic bag or container</td>
</tr>
<tr>
<td>5. Non-infectious/non</td>
<td>Black</td>
<td>Plastic bag or container</td>
</tr>
</tbody>
</table>
6. Radioactive waste
   | Any, but with radiation hazard symbol | Lead box, labelled with radioactive symbol
7. General healthcare waste
   | Black | Plastic bag or container

Infectious, Pathological and Sharp waste should also be marked with the international biohazard symbol.

Chemicals should also be marked with the appropriate international chemical hazard symbol.

Note:
1) Colour coding of waste categories with multiple treatment options as defined in the Seventh Schedule, shall be selected depending on treatment option chosen, which shall be as specified in the Seventh Schedule.
2) Collection bags for waste types needing incineration shall not be made of chlorinated plastics.

EIGHTH SCHEDULE
(Made under regulation 47)
